

TECHNICAL DATA SHEET

SK5PF135-2 Protective film

► DESCRIPTION

Polyurethane Protective Film is a removable, resistant tape made from an abrasion resistant polyurethane elastomer that resists puncture, tearing, abrasion and erosion. Film is constructed with low tack acrylic adhesive, protected with an easy-release poly liner.

This product is used in various manufacturing processes of parts made of polymer composite materials.

Main advantages :

- Low adhesive coating.
- Possibility to use in interiors and external surfaces up to 6 months.
- Removing without adhesive rests from various surfaces.
- Protection against environmental influences and mechanical damage.

► TECHNICAL DATA

Material type:	Polyurethane elastomer
Adhesive type:	Acrylic
Total thickness:	0,23 mm
Film thickness:	0,20 mm
Adhesive thickness:	0,03 mm
Temperature range:	-20°C till +135 °C
Colour:	Clear
Elongation at break:	300%

► SIZE

Thickness	Width	Length	Type
230µm +/-10%	From 12,5mm till 1220mm	33m	Sheeting

Shelf life: 24 months in original packing

Storage conditions: it is recommended to store at temperature from -20°C until +30°C in the original packing.

► NOTE

Other sizes are available on special order.
